Las Pilitas Resources, LLC; DRC2009-00025
Basis For Appeal**

The Denial Findings adopted by the Planning Commission are not supported by substantial evidence, and in fact are contradicted in many cases by the evidence in the record. Many of the findings amount to unsubstantiated conjecture, and are based on inaccuracies and misunderstandings about the project that were presented by Staff and others. In addition, the Planning Commission erred by not considering the importance of this aggregate resource to the region as a whole as required by state law, as well as other considerations that are specific to mineral resources and which alter the traditional CUP findings for projects such as this.

Further details regarding each of these points will be submitted directly to the Supervisors for their consideration in the course of this appeal.
